

Letter from the Editors

Dear Readers,

Welcome to the Volume 6, No. 2 Spring 2013 issue of *Intersect: The Stanford Journal of Science, Technology and Society*, our final publication of the academic year and our last edition as Editors-in-Chief.

Working on *Intersect* these past two years has been an incredibly wonderful and rewarding experience. When we first joined as editors, the journal, run by one editor and one advisor, mostly served Stanford students. With many changes in the world of online publishing, *Intersect* has adapted strongly. *Intersect* is now international, quarterly representing student work in Science, Technology and Society studies and is being cited by other scholars, based on Google Scholar. Further, *Intersect* is a public, open-access journal that spreads innovative STS research to the field's scholars and enthusiasts. The potential of online journal publishing is exciting, fruitful, and necessary for modern education and research.

We wish to give a huge thanks to the vision and mentorship of Professor John Willinsky. His work on creating public access to research is admirable, inspiring, and progressive. We would also like to extend a special thanks to the following people, without whom this journal would not have been possible:
